Our Service Process

1

2

3

4

5

6

7

8

9

Step 1: Consult & Survey – We start with a detailed site visit to understand load requirements, layout, usage patterns and budget.

Step 2: Design & Execute – Based on the survey, we design the most efficient solution, supply the right equipment and complete installation or repair with strict quality checks

Step 3: Support & Maintain – After completion, we provide clear handover, training where needed, and ongoing AMC or on-call support to keep systems running at peak performance
